PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of production experience building scalable web applications and AI-powered systems. Specializes in **Python (FastAPI), TypeScript, React, and Next.js**, with deep hands-on experience integrating **LLMs using LangChain and LangGraph** to ship intelligent, agentic workflows. Proven track record delivering **RAG pipelines, multi-agent systems**, and production-grade REST APIs. Strong focus on system design, performance optimization, and CI/CD best practices in Agile environments.

PROFESSIONAL EXPERIENCE

Software Engineer · Artslab Creatives, Colombo, Sri Lanka

Feb 2026 – Present

- Designed and deployed **FastAPI microservices** handling 10,000+ daily requests, reducing average response latency by 35% through async query optimization and connection pooling.
- Built **LangChain + LangGraph multi-agent pipelines** that automated document processing workflows, cutting manual effort by 60% across client projects.
- Engineered **RAG systems** using vector databases (Pinecone/pgvector) and OpenAI/Gemini embeddings, enabling context-aware search and intelligent Q&A over large enterprise datasets.
- Architected and shipped **Next.js full-stack applications** with server-side rendering and REST/GraphQL APIs, deployed on AWS (EC2, S3, Lambda) and GCP.
- Implemented **JWT-based authentication and RBAC** across multiple projects, ensuring secure, scalable access control for production applications.
- Led database design and query optimization for **PostgreSQL and MongoDB** schemas, improving query performance by up to 50% on high-volume tables.

Associate Software Engineer · Artslab Creatives, Colombo, Sri Lanka

Jun 2024 – Jan 2026

- Delivered full-stack features across **5+ client projects** using React, Node.js, and Spring Boot in a fast-paced Agile sprint cycle.
- Integrated **OpenAI and Google Gemini APIs** to build AI-driven content generation features, reducing content production time by 40%.
- Contributed to the design and implementation of **RESTful APIs** with versioning, rate limiting, and Swagger documentation used by third-party consumers.
- Maintained CI/CD pipelines using **GitHub Actions and Docker**, ensuring zero-downtime deployments to staging and production.

KEY PROJECTS

AI Document Intelligence Platform

Python · FastAPI · LangChain · LangGraph · pgvector · Next.js · PostgreSQL · Docker

- Built a multi-agent document processing system using **LangGraph** to orchestrate extraction, summarization, and Q&A agents over uploaded PDFs and documents.
- Implemented **RAG pipeline** with OpenAI embeddings and pgvector, achieving sub-500ms retrieval latency on a 50,000-document corpus.
- Exposed the system via a **FastAPI** REST interface with async endpoints, background task queues (Celery + Redis), and a Next.js dashboard for real-time status tracking.

Agentic Customer Support Automation

Python · FastAPI · LangChain · LangGraph · OpenAI · Next.js · MongoDB

- Designed a **ReAct agent** using LangGraph that routes customer queries, retrieves policy documents via RAG, and escalates edge cases to human agents.
- Reduced average ticket resolution time by **55%** in testing by automating Tier-1 support responses with tool-calling agents.
- Built a **Next.js operator dashboard** with real-time WebSocket updates for agent conversation monitoring and human-in-the-loop override.

Developer Portfolio & AI Chat Interface

Next.js · TypeScript · Vercel AI SDK · LangChain · TailwindCSS

- Built a personal portfolio with an embedded **AI assistant** that answers questions about skills, projects, and experience using RAG over a custom knowledge base.
- Integrated **Vercel AI SDK streaming** for real-time token-by-token responses, with fallback handling and conversation memory.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#

AI / LLM: LangChain, LangGraph, RAG, Agents, OpenAI API, Google Gemini, Vercel AI SDK, Embeddings, Vector Databases

Backend: FastAPI, Node.js, Express, Spring Boot, .NET Core, REST APIs, GraphQL, WebSockets

Frontend: Next.js, React.js, React Native, TailwindCSS

Databases: PostgreSQL, MongoDB, MySQL, pgvector, Pinecone

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Docker, GitHub Actions, CI/CD, JIRA

Testing: Jest, Mocha, Pytest

CERTIFICATIONS

Java Spring Framework 6 with Spring Boot 3 · Udemy · 2024

Full Stack Web Development Bootcamp · Udemy · 2021
